# ABOUT US

**Adaptive Business Concepts LLC (ABC)** is a global technology solutions and services provider for **APTERP**, based in Dubai, UAE, with research and development centers in UAE, and India. ABC is providing complete customizable and integrated solutions for various business segments across MENA Region. It is our assurance that our Enterprise Resource Planning solution, APTERP (Application Process Technology ERP), will deliver the complete business process tool for pioneering firms to manage the entire business processes.

APTERP, from the house of ABC, is a holistic business IT solution, developed keeping in mind the requirements of managing all the business entities of an organization under a single roof. It addresses all the business modules, namely, Procurement, Inventory, Production, Sales, Finance, QC, Payroll & HR, and Asset Management. Complimenting these functionalities is the facility to view managerial reports for effective decision-making.

APTERP seamlessly integrates all the branches to the corporate office, hence providing access to business processes from a single application. The system is highly adaptable, allowing easy customization, and helps you cope with constant change of including multiple entity, currency, & location deployment. The solution employs user-friendly graphical interface for ease of handling the functions required by the users. It clearly defines the workflow and effectively assists in managing each process. Since the system connects all locations, the top management can avail the real time information of the day-to-day activities at any given point of time. The solution is developed in conformity with the regional requirements of economic and legal statutes.

With prompt service, over the years, APTERP has evolved itself to deliver the exact thoughts and intents of the customers and partner with them in their quest for success. It is with great assurance and confidence that we are proud to represent prominent customer across the globe.

# EVOLVE WITH APT

# **APT**W3

APTW3 has been developed fully on JAVA framework to operate as a thin client from any location. It's a purely web based application. The application can be run on Windows/MAC/Linux OS and support multi databases – MSSQL, Oracle & MySQL. It enables multi lingual and can be used as per the country specific requirements using setup control panel. APTW3 provides safe and secure on line access guarantee with Secure Socket Layer (SSL) technology. In addition it provides secured user accounts authorization with OTP (One time password) technology. APTW3 is developed as SOA (Service Oriented Architecture) for communicating with other APT modules or other applications.
## ACCESS FROM ANYWHERE

# APTW3 WEB

APT on Web has been developed fully on JAVA framework to operate as a thin client from any location. The application can be run on Windows/MAC/Linux OS and support multi databases – MSSQL, Oracle & MySQL.
